

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

Please amend claims 3 and 4 as indicated below (material to be inserted is in **bold and underline**, material to be deleted is in ~~strikeout~~ or (if the deletion is of five or fewer consecutive characters or would be difficult to see) in double brackets [[ ]]):

**Listing of Claims:**

1. (Previously Presented) A presentation system comprising:  
a writing surface coupled with a frame, the writing surface being adapted to receive erasable ink; and  
a printer coupled with the frame, the printer including a printhead configured to print an image on the writing surface with erasable ink; wherein the printhead is adapted to move along a traverse rail.
2. (Cancelled)
3. (Currently Amended) The presentation system of claim [[2]] **1** wherein the traverse rail is adapted to traverse the writing surface.
4. (Currently Amended) The presentation system of claim [[2]] **1** wherein the writing surface is adapted to move past the printhead.
5. (Original) The presentation system of claim 4 wherein the writing surface is a flexible sheet configured for selected passage past the printhead.
6. (Previously Presented) The presentation system of claim 5 further comprising a roller mechanism configured to engage the flexible sheet to pass the flexible sheet past the printhead.

Page 2 - AMENDMENT  
Serial No. 09/892,422  
HP Docket No. 10005234-1  
KH Docket No. HPCB 312

7. (Original) The presentation system of claim 6 wherein the flexible sheet forms a continuous loop.

8. (Original) The presentation system of claim 6 wherein the rollers are motor-driven and adapted to rotate the rollers such that the writing surface is moved past the printhead.

9. (Original) The presentation system of claim 1 further including a scanner.

10. (Original) The presentation system of claim 9 wherein the scanner is adapted to scan the writing surface.

11. (Original) The presentation system of claim 10 including an attached second printer in communication with the scanner.

12. (Original) The presentation system of claim 1 further including an eraser adapted to erase the writing surface.

13. (Original) The presentation system of claim 12 wherein the eraser is adapted to traverse the writing surface.

14. (Original) The presentation system of claim 12 wherein the writing surface is adapted to move past the eraser.

15. (Original) The presentation system of claim 1 in combination with a processor having memory, the processor being in communication with the printer and adapted to provide an image to the printer to be printed on the writing surface.

16. (Original) The presentation system of claim 1 wherein the erasable ink is dry-erase ink.

17. (Original) The presentation system of claim 1 wherein the writing surface is 2' x 3' or larger.

18. (Previously Presented) A presentation system comprising:  
a presentation board adapted to display an image for simultaneous viewing by  
a plurality of viewers, the presentation board comprising:

a writing surface; and

a printer disposed to print non-permanent ink onto the writing surface;

a scanner adapted to scan the writing surface;

an electronic image; and

a processor adapted to transmit the electronic image to the printer.

19. (Original) The presentation system of claim 18 wherein the printhead  
is adapted to print with erasable ink and the writing surface is adapted to receive  
erasable ink.

20. (Original) The presentation system of claim 19 wherein the erasable  
ink is dry-erase ink.

21. (Cancelled)

22. (Original) The presentation system of claim 19 further including an  
eraser.

23. (Previously Presented) A method for creating an image to be viewed  
during a presentation comprising:

obtaining, in electronic form, the image to be viewed;

sending the image to a presentation system including a printer with a  
printhead adapted to print erasable ink onto a writing surface; and

printing the image on the writing surface.

24. (Original) The method of claim 23 wherein the printer is adapted to  
print images in dry-erase ink.

25. (Original) The method of claim 23 further comprising, scanning an image on the writing surface, saving the scanned image in electronic form, and printing the scanned image on the writing surface at a later time.

26. (Previously Presented) A presentation system comprising:

a writing surface coupled with a frame, the writing surface being adapted to receive erasable ink;

a printer coupled with the frame, the printer including a printhead adapted to move along a traverse rail, where the printhead is configured to print an image on the writing surface with erasable ink; and

a scanner adapted to scan the writing surface.

27. (Previously Presented) A method for creating an image to be viewed on a presentation system during a presentation, wherein the presentation system includes a writing surface, a printer with a printhead adapted to print erasable ink onto the writing surface, and a scanner configured to scan an image on the writing surface, the method comprising:

scanning an image on a writing surface;

saving the scanned image in electronic form;

erasing the image; and

printing the scanned image on the writing surface at a later time using the printer.
